

Dr. Bosworth's Secret Formula for Good health

Most everyone knows that Good Health and a Sense of Well Being are two of the most valuable possessions in this life. Unfortunately, today's ever increasing population plus ever increasing governmental regulations have taken their toll on the delivery system of good health care. "House calls" by physicians have become a thing of the past. Insurance companies have intervened with untold forms to be filled out and condition to be verified. As a result, doctor's offices, clinics, and hospital E.R.s and out-patient departments have tended to become "cold" and impersonal. Not so at Dr. Bosworth's Redi-Care Health Center. Dr. B. Has done the finest job possible at maintaining a warm and caring atmosphere which reflects the personal interest he maintains in all his patients, on an individual basis.

Excellent physician that he is, Dr. Bosworth knows that if his personal concern is not truly felt by the patient, his remedies will surely not be as effective. All good physicians are aware of this fact.

Therefore, Dr. B. has surrounded himself with medical personnel that share that same belief, and show it! The result is that a visit to Dr. Bosworth's Health Center, for whatever reason, will surely result in a healthier, happier person. It's the next best thing to a "house call"!

Therefore, if and when you should need the help of a physician to restore your good health, I highly recommend a visit to Dr. Bosworth's Redi-Care Health Center.

A retired Lansing physician,

Charles O. Long, M.D., F.A.C.R.
